

AGROMAX™

CULTIVATION STRIP

Thank you for purchasing the AgroMax™ 20W Cultivation Strip. Please familiarize yourself with the installation warnings and guidelines below to ensure safety and proper usage.

WARNING: Risk of fire or electric shock. The electrical rating of this product is 120V. The installer must determine whether they have 120V before installation. When connecting units end-to-end or via daisy chain, do not exceed 20 Cultivation Strips on one 120V circuit.

WARNING: Risk of fire or electric shock. Cultivation Strip wiring and electrical parts may be damaged when drilling for installation of the LED fixture. Check for enclosed wiring and hanging hardware components.

WARNING: Risk of fire or electrical shock. LED fixture installation requires knowledge of LED electrical systems. Installation should be performed only by a qualified electrician in accordance with the National Electrical Code and relevant local code.

WARNING: INSTALLATION SHOULD ONLY BE PERFORMED WHILE POWER TO THE FIXTURE HAS BEEN DISCONNECTED.

- Disconnect power at the source before installation, inspection, or removal.
- No more than 20 Cultivation Strip units can be connected on the same 120V line.
- Do not use if product is damaged.
- Do not alter, relocate, or remove wiring, lampholders, power supply, or any other electrical component.
- Do not use abrasive materials, glass cleaners, or other solvents on cover plate or lens. Use of these substances may damage fixture. To clean faceplate, use a mild soap solution.
- This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.
- Suitable for damp or dry locations only.

INSTALLATION GUIDE: CONNECTING MULTIPLE CULTIVATION STRIP FIXTURES.
